DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Claims 1-12 and 14-19 are directly related to a first embodiment of a delta-sigma modulator circuit as shown in Figs. 3 and 4 of the present invention; and

Claim 13 is directly related to a second embodiment of a delta-sigma modulator circuit as shown in Fig. 8 of the present invention.

Notice, during the telephonic interview on May 30, 2001, the Applicant was suggested by the examiner to cancel claim 13 because it reads on a different embodiment of the present invention other than the embodiment of claims 1-12 and 14-19. Also see the examiner's Interview Summary.

Applicant also note the amendment to the specification regarding to page 2, line 27 and page 4, lines 8-11 has not been entered because the amendment to the specification does not comply with the new rules that filed on or after March 1, 2001, the amendment to the specification must be amended within a paragraph. Further, the changes to page 4, lines 8-11 can not be found. See paragraph 4 of the first Office action.

Art Unit: 2634

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
